

## **Watch: Thief walks away after spotting Tag etching**

Auto theft is on the rise, but prevention is possible. A recent video from one of our Gore Mutual employees shows a suspect approaching their vehicle, spotting the Tag etching on the window—and immediately walking away.

Through our partnership with Tag, we're helping drivers protect their vehicles before theft even happens. Encourage your customers to take advantage of this proven theft deterrence solution. Vehicles with Tag's security etching and tracking technology don't just get recovered faster—they stop thieves in their tracks.

Speak to your business development representative to learn why Tag may be the protection your clients need.
